

CASE STUDY (CSF113):

A Customs officer looks for laboratories to detect and identify Living Modified Organisms (LMOs).

Objective:

Use the Biosafety Clearing House (BCH) to find information to find laboratories for detecting and identifying LMOs that can be used to test samples from the border.

Scenario:

You are a customs officer in Myanmar's port responsible for activities related to transboundary movements of LMOs. You need to find a laboratory where you can send your samples for testing.
