

CASE STUDY (CSF15):

A phytosanitary officer looks for maize-stacked events in the field.

Objective:

Use the Biosafety Clearing House (BCH) to find information about stacked events that can be present in a planted field.

Scenario:

You are a phytosanitary officer in the Czech Republic. You are inspecting a field planted with MON-ØØ81Ø-6 - YieldGard™ maize.

Q. What stacked events can be present with this event?
