

CASE STUDY (CSI03):

A Competent National Authority (CNA) member seeks information on submitting a record to the Biosafety Clearing House (BCH).

Objective:

- To understand what information should be submitted to the BCH after a country 'makes a decision' on putting food produced from a Living Modified Organism (LMO) on the market and how it is done through the Biosafety Clearing House (BCH).

Scenario

Use the information in the 'Australia New Zealand Food Authority Final Risk Analysis Report, Application A346' to submit a decision record ([new link](#)) on the BCH. Detail each step you take in the preparation of this record, including:

- Q1.** The relevant articles from the Protocol that relate to this record;
- Q2.** The source(s) of any additional information taken from the BCH that you may use;
- Q3.** Any additional information that may be required.

Mechanics:

Participants should be divided into four groups of four members each. Each group will be assigned a given country. Participants in each group will take turns assuming the BCH National Focal Point role while the rest are National Authorized Users.

Groups and log-in details are summarized below:

Participants should visit the BCH' Training Site' (<https://bch.cbd.int>> Help> Training Site). Then log in using the assigned country user names and passwords.

Following the assigned role (NAU1, NAU2, etc.), each participant should identify information missing in the analysis report and is required to publish the relevant records. Then within the group, they should discuss the missing information and the relevant Cartagena Protocol articles.
