BCH Regional Advisers

In Biosafety

Objective of BCH III Project:

“Strengthen of BCH Regional Advisor system as a support to Parties for an effective participation in the BCH building synergies with other MEA”.

Training

- Deliver training activities, with national counterparts, in the use and access of the BCH;

Academia

- Help with the integration of existing BCH training curricula into national academic courses;

Sustainability

- Help devising Terms of Reference or task descriptions to be included as part of National Focal Point job description and assist in developing Biosafety systems

Biosafety

We support governments to manage the potential adverse effects and benefits of modern biotechnology, with a focus on protecting biological diversity and human health.

[▶ LEARN MORE ABOUT BIOSAFETY](#)

THE CHALLENGE

Modern biotechnology can bring many benefits, but there are concerns that it could also have adverse impacts on biodiversity and human health.
